

What is CA AB 1953?

California Assembly Bill 1953 (CA AB 1953) prohibits the installation or repair of any pipe, plumbing fitting or fixture conveying water for human consumption that is not lead free after January 1, 2010.

What is meant by Lead Free?

Lead free is defined as any pipe, plumbing fitting or fixture having a weighted average lead content of the wetted surface area of not more than 0.25%.

Who does CA AB 1953 affect?

CA AB 1953 is a California state law & only applies to products in CA. However, the state of Vermont has enacted a similar law and other states are considering similar legislation.

What does CA AB 1953 mean to me?

If you live in CA all pipes, plumbing fittings or fixtures being installed or repaired in a residential, commercial or institutional application which convey water for human consumption must meet CA AB 1953 regulations.

What is **SPEAKMAN** doing?

Speakman has already re-engineered most of our commercial plumbing products to comply with CA AB 1953 with plans to complete the transition for all required products by the end of 2009. The re-engineered products retain the same specification quality you expect from Speakman products.
