With friends in different rooms at a hotel in Vegas, we both independently remarked that the shower heads in our rooms were the best we've ever used. I nearly stole ours right from the hotel but fortunately the iPad we brought showed we could purchase our own from the Speakman Company. I bought one as soon as we got home and have loved it ever since.

I experienced this shower at the Sheraton in St. Louis and ordered one as soon as I got home. It didn't hurt that it was marked way down as an overstock item! It's easy to install and provides a wonderful even shower. My guests are gonna LOVE it!!! I do!

...One day, when turning on the water, the difference in the water pressure and spray felt as if someone had opened the flood gates. Indeed, it was the thickest, meatiest, most refreshing stream of water I had experienced, more akin to a natural waterfall!...

I ordered this brand as I stayed at a hotel that uses this brand and loved the showerhead. It is great water flow-not that misty spatter that takes forever to rinse. This showerhead really gets the water flowing. It is great for quickly rinsing long, thick hair. Reasonably-priced, excellent value, too. Highly recommend! *-Heather 1/11/2011*

If it's the little things in life that make us happy then having an awesome shower head is right at the top of the checklist. I first experienced the Speakman Heavenly Shower head while staying at a Westin hotel and was immediately sold. I bought one on Amazon the first chance I had and haven't regretted the decision at all...

Tremendous!! Great shower experience. Easy to install. I first experienced this showerhead in a Westin. My wife recently commented on this showerhead in a recent hotel visit as well. She never seemed to care before but really liked it. Easy adjustment for dual or single, and for pulse versus stream. I really like because feels like whole body get shower spray not just top down. Highly recommend!!

I bought this after staying at a Westin with this "Heavenly" showerhead. The Speakman S-2252-2 Anystream is worth every penny. It's the best shower I've ever had (frequent traveler, 46 years old). If you want Starwood hotels luxury at home, don't hesitate.

I've had my Anystream 2000 for about 12 years now. We even took it with us when we moved. Take out the restrictor and it's a freaking fire hose. Many days the only thing that gets me out of bed on time is the thought of my shower with the Speakman. This device is required to live, what I consider, a truly civilized life. I'm thinking about buying one for long business trips.

Holy shizer batman, this thing is way over engineered... If you appreciate the over engineering of things for the the simple fact of build it right or don't build it, you'll love this shower head. This bad lad's body is constructed of brass and the finish is spot on matching the existing hardware. I was skeptical about the 6 spray nozzle setup, but these 6 nozzles that are fully adjustable have better water flow and coverage that the stock Price Pfister 50 adjustable model.

It simply blows my mind that this shower head weighs at least 5 times more that the kit shower head that I am replacing. The adjustable stream will blow you outta the shower or drench you depending on your preference.

This was a simple replacement with a little teflon tape and a band wrench - 2 minutes top.

I expect to get years of service out of this shower head.

This should be called "The Kramer" :-) Awesome! My brother recommended this shower head. After he installed this model in his bathroom, his daughter said "it's just like being at a hotel!!" He penned it "The Kramer" after that hilarious Seinfeld episode about the low flow showers. Having this shower head is reminiscent of the Commando 450 that Kramer installed. It has a mighty powerful steam. Our water pressure was so low, the previous shower head just seemed to trickle out the water. I gave up showers and went to baths. But after installing this shower head, I am back to showers (yeah!). It's shaved off at least 15 minutes prep time in the morning before work so there's an extra 15 minutes of shut eye. Buy this model - you will NOT be disappointed!!

This is my 3rd Speakman showerhead. I had one in Indiana, and when we moved to Florida, I bought 2 more. It gives a STRONG stream of water that is adjustable from fine spray to a heavy soaker type stream. Very well made.

go ahead...fall in love! sure, there are other shower heads - big round drizzling waterfall heads, pulsating and massaging heads and low-flow (remember the seinfeld episode?) no body enjoys. and then there's this....not only is it sturdy and chrome, not plastic...but it is THE most efficient at removing shampoo/conditioner from thick hair. when i started dating my last boyfriend, i ordered this one and replaced his shower head...i've moved on but even though the memory is still sad for him, he did, after all, fall in love - with the speakman showerhead! - Barbara Smith 9/25/2011

A Real Gusher. This is a terrific shower head. Guarantees that you will get wet - really wet - and clean, if you use soap at the same time. Soap matters. The gushing hot water feels great. Much cheaper than therapy. The whole experience is better, of course, if you heat your water with solar energy. Then you can shower without guilt. Totally green and you'll be totally clean.

Perfect for Houston's drought condition. Low water pressure meant that I had to walk around in the shower looking for enough water to shower, but no more! My new Speakman S-2005-HB Anystream Hotel Showerhead Speakman S-2005-HB Anystream Hotel Showerhead in Polished Chrome maximizes the available water and gives me a luxurious shower, even at 7 a.m. when all the neighbors are getting ready for work, too. Exactly what I was looking for. Recently moved into a new rental unit and the shower pressure was not what I was accustomed to; a bit on the low side. After doing all kinds of research and reading reviews, etc., I bought the Speakman S-2005-HB Anystream Hotel, had it installed yesterday, and it's exactly what I was looking for. The shower pressure is great (did not have to remove the flow restrictor). Plenty of water and very solid pressure. I generally go with the full body stream, but I've tested out the spray settings and they're great, too. I saw more expensive showerheads, but for less than \$40, I'm happy with the purchase. I can definitely recommend this showerhead. Thank you to all the other folks who reviewed the product here on Amazon. They convinced me to go with this one.

Like others, the name of this showerhead came from above as I enjoyed a wonderful full stream shower during a recent hotel stay. I picked this model based on the amazon reviews and I even purchased one as a birthday gift for a friend. We are totally content with the 2.5GPM and do not intend to remove the flow restrictor. It's a wonderful shower experience.

We love the shower head. I used one at an Embassy Suites hotel and was pleased with it. So, I called them to ask the brand, etc. Hilton told me what it was. At home we have had a good Kohler shower head that provided a non-adjustable wide-spread shower - too wide spread. I prefer the Speakman greatly. It adjusts well and provides a more narrow water stream, putting the water where you want it. It looks great, too. - Tom D 9/12/2011

What can I say - this showerhead is amazing. Until purchasing this one, I purchased showerhead after showerhead only to be disappointed in the quality and flow. Now that I have this one, I am finally happy. It was definitely worth the money.

It is fairly heavy-duty as another review mentioned. I really like the fact the adjustment handle on the side of the showerhead is easy to move even with the water on. I highly recommend this showerhead! - David J. Schlum 10/15/2010

I reviewed a lot of showerheads before deciding on this one. Speakman is supposed to make pretty good showerheads from the info I've found, so I thought I'd give it a shot. Great affordable showerhead. The amount of water and pressure produced by this showerhead is great, the connector is metal, so no cracking or breaking when installing. No cons whatsoever. If you're looking for a good showerhead and don't want to spend a lot of money, this one is perfect. I can't imagine paying more money for anything else. - *C. Lepper "whatyouare" 5/25/2011*

Bought this showerhead after a recommendation from a friend. It was difficult to justify spending over \$100 for a showerhead when I couldn't bring myself to spend \$50 for one at Target, but I respected my friend's opinion and took a leap of faith. It is amazing. It turns your usual shower into a refreshing and luxurious experience. It is very easy to install, looks beautiful, and has great pressure for both the stream and pulse settings. It is easy to switch between the settings, switch between one- and two- shower heads, and otherwise rotate/adjust the heads to point in the perfect direction. Very elegant, relaxing, and highly recommended.

After staying in Westin hotels on numerous occasions I finally broke down and paid the high price for the Speakman heavenly shower head. I have wanted one for years, however being the penny pincher that I am, I just could not justify to myself paying over \$100 for a shower head. Well I received and installed my heavenly shower head today and it was well worth the money. Installation was quick and easy. At first I was worried that my home shower would not have the same water pressure as the hotels, and thus not feel as good at home. To my surprise and satisfaction the water pressure was great and the shower immersed my whole body in the relaxing warm water.

SPEAKMAN SHOWER REVIEWS

RATING: ★★★★★

I have had this shower head for about 15 years, and one of the best reasons that I will get another one of these Speakman shower heads is that it actually helps to build up higher pressure showers. This has about 4 settings, the lowest being a gentle flood flowing rate, the highest setting be an all out super high power niagra falls type of shower. The polish has never rusted, chipped or flaked in the 15 or more years of having this shower head. All I do is wash the head with some mild soap and water and the head shines like new each time. For those who are thinking if the price is justified... all I have to say is buy it, you will not be disappointed.

This is extremely beneficial to those with low water pressure, now you dont have to sit and wait for soap to rinse off your body with a weak shower head... with this shower head... taking showers are fun. - A. Chacko 5/31/2006

For those of us who have a small shower stall, this head works best.. Don't think just because the larger model is still adjustable it would work better. The smaller one does an even better job in small stalls. - *G. Feldman 7/18/2010*

RATING: ★★★★★

I've used Speakman shower heads for years. They are simple to adjust and have a nice full coverage flow. A great combination of pressure and flow. They are one of my favorite things...if you appreciate a good shower you will understand! Every time I move I end up buying a few. I have 3 in my current home. This particular model one is not the highest quality of the Speakman line as the housing appears to be chrome covered plastic, but the actual performance is very good.

Our previous home had a bit more water pressure so we had a 6 jet Speakman that was much more heavily constructed. Like I said though, even the 4 jet outperforms pretty much anything else I've tried in my home, friend's homes or hotels. I even bought one for my parent's guest bathroom. They have very poor water pressure and I just couldn't stand the shower. It's still not as good as it would be in a higher pressure home, but it made a definite improvement.

Final comment, for some reason the 4 jet version is next to impossible to find at the big box home improvement centers so it is nice to have the online option.

After a great stay at the Westin New York Time Square, I decided to purchase a dual showerhead. Westin Hotel uses Speakman "Heavenly" products designed specifically for them. I purchased the next level up because I didn't want the pulsating massage option. The Speakman S-2252-2 is fantastic. It's very well made with brass and chrome. It makes the morning shower a terrific experience. I now take shorter showers because of the tremendous volume of water it sprays. To conserve water, you can shut one of the heads off but I never do. I can't recommend the Speakman Anystream showerhead more highly. The elevation of our house is about 150 feet above our source of municipal water, so the resulting low water pressure kept the water stream in our shower from hitting the side of our shower stall. The Speakman more than solved the problem, and the water stream now hits with force wherever we point the showerhead. The 48 jets also do an excellent job of covering a wide area, making for an outstanding shower. - *David 2/11/2009*

I've been a Speakman Shower Head fan for over twenty years now, so it was no surprise to me how well the unit worked once I installed it. Just a glorious showering experience. The best stream dispersion and pressure, while conserving water.

Now if you're like me and you really like a lot of pressure when you shower, simply remove the water restricter within the shower head itself, and then look out baby! Once that little piece of plastic and rubber is out of the way (the restrictor) you get an incredibly invigorating shower experience. Its awesome.

Additionally, most of the parts on any Speakman Shower Head or hand held Shower unit are servicable, so you can simply contact Speakman directly and order replacement parts. Speakman is a great company (with solid customer service), who focuses on shower head product design and manufacture. When you buy ANY Speakman Shower Head product, rest assured its the very best. It does cost a lot more than most of the manufacturers out there, but this company's over all build quality and shower performance is unsurpassed and well worth the extra money, end of story.

Have I said enough now? Good. Enjoy! - *Jeffrey Belack "Superdad"*

It's always so hard to find a truly good showerhead. But, after staying at the Marriott hotel, it only took the second time for me staying there to decide I was having one of those shower heads no matter what it took. I will probably make it a point from now on to stay in hotels that only have these showerheads.

After many stays in Marriott hotels, I had to have Speakman in my own shower. We are so pleased with the Speakman shower heads, that when we recently moved and ordered new Speakman heads, both handheld and fixed for our new home ... and we carried them in our bags for early access.... Speakman is the best shower experience I have ever known. - *WG in Florida 8/8/2011*

I used this showerhead when I stayed at a Marriot hotel and fell in love! Usually hotel showerheads either sting my skin because the pressure is too much, or I don't get enough leaving shampoo in my hair! This was right in the middle! The second I got home I ordered one. I'll never use another brand again.

- Andrea 3/22/2011

I tried the hotel one. It was pretty nice I usually try to not to run the shower full blast to conserve water and it made it seem like I have the water turned on more than it was. It seemed to increase the pressure. The massage stream was nice too.

My Dad used to have these in the house where we grew up in the 1960's. He let them lime up too badly to use, so he replaced them. I found one of the limed-up units, etched the lime out, and installed it in the house-trailer shower where I was living while at college. It was an instant hit. The only thing missing was a 300-gallon water heater. After 40 years, I re-discovered Speakman shower heads on the internet. I almost broke my arm getting my Visa out. I have 65 psi water pressure, and I thought I would have to remove the flow restrictor to get the full Speakman experience. The water flow at 65 psi was such that the shower floor had better not be slippery. Still the best shower head ever made.

Functionally the best I've ever had. Some shower heads look fancier but when it comes to providing an efficient stream of targeted water pressure for rinsing, nothing beats this. We purchased 2 hand held shower heads from Home Depot and Lowe's. They both had to go back - not enough pressure and incredibly stiff hoses. Decided to take a chance on these and we love them. Also bought VS-#3232. Upstairs bathroom has terrible water pressure and this model works like we have strong pressure. Like the bit of rubber on the handle for gripping and the shower head is notched for easy turning. We now rarely use our original shower head and if we had realized how good the Speakman hand held shower head was, we might not have needed to buy the model with the 3-way diverter (just used the hand held only), but it is nice to have the option. - upsidedown 5/23/2011

... It produces a very nice, strong, full-coverage (not just an outer ring like some showerheads) flow. We're using it as our main shower head, not just an accessory, and it's as good or better than just about any moderately priced and legal (i.e., no removed limiters) shower head I've used. In fact I just got back from a family member's newly built beach house, where they have several different Hansgrohe shower heads and handshowers. I tried a couple of them and they all seemed inferior to the Speakman...
